

# Surface Decoration Survey

Summer Session II – Tuesdays - Emerge

Are you ready to change the look of your pots? Do you feel that they lack some special interest? Then this survey of surface decoration techniques may be just what you need to inspire you to make your pots your own. This class does *not* emphasize throwing techniques; potters will be expected to bring pots/tiles to practice techniques. We will address surface decorating options at each phase of the ceramic process: wet, leather hard, and bisque.

## Topics include:

- Stamping
- Thick slip
- Mishima

- Under-glaze
- Carving
- Slip trailing
- Tape resist
- Wax resist
- Gaze layering
